

Fall 2009 Engineering Career Fair

Tuesday, September 29, 2009

1:00 PM — 6:00 PM

Iowa Memorial Union

Spring 2010 Engineering Job & Internship Fair

Tuesday, February 2, 2010

2:00 PM — 6:00 PM

Location TBD

Registration Fees

Registration fee for the fairs is **\$450**. This includes a 6' table, food, drinks and parking for one vehicle, and special hotel discounts.

In addition, registrants will have a listing in the employer directory and be included in all fair marketing, publications and advertisements to students and alumni.

Companies attending our fairs are included in the College's preferred partners list and are eligible for special programming including Career Connection for Alumni, Guest Seminar Speakers and other programming opportunities.

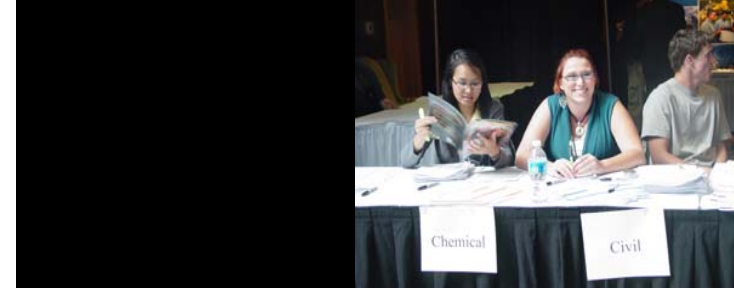

The engineering fairs are one of the most effective and cost-efficient ways to recruit top engineering students.

College of Engineering Career and Job Fair Information

A focus in wind energy...

With the increasingly competitive market for engineers, regular attendance at the engineering fairs is essential to build and maintain your company's name recognition on campus and to recruit top engineering talent.

The Department of Mechanical and Industrial Engineering has launched a MS degree in Industrial Engineering with a graduate focus in wind power management, designed to educate professionals for:

- **Design, operations and management of wind farms**
- **System and management of wind power facilities**
- **Interactions with other alternative and conventional power generation systems**

Other courses offered for all students include Wind Power Management, Energy Systems Design and Fundamentals of Wind Turbines.

Each year the College of Engineering holds two fairs: a career fair in the fall and a job & internship fair in the spring. This is a great way for organizations to meet up to 600 engineering students and alumni to discuss full-time, co-op and internship opportunities in the areas of:

- **Biomedical Engineering**
- **Chemical & Biochemical Engineering**
- **Civil & Environmental Engineering**
- **Electrical & Computer Engineering**
- **Industrial Engineering**
- **Mechanical Engineering**
- **Computer Science**

Areas of Expertise...

- **Composites, Blades and Nacelle Covers**
- **Software Control and Sensors; Electronics, Control Devices**
- **Mechanical Engineering, Gearbox, Gears and Drive Train**
- **Manufacturing Process, Material Handling, and Automation**
- **Meteorology**

The fairs serve December and May graduates and alumni seeking full-time employment, as well as students looking for summer internships and/or spring and fall co-ops. Employers are encouraged to talk with first-year engineering students who may be exploring possible careers paths and companies. The fairs officially kick off the start of each recruiting season with many companies filling interview schedules at the fair.

Why Recruit @ The University of Iowa...

- Over 1700 engineering undergraduate and graduate students
- All 6 undergraduate programs accredited
- College ranks in top 20% of engineering undergraduate and graduate programs nationally by *US News & World Report*
- Students entering the college have ACT scores that are in the top 10% nationally
- 20% of undergraduate students are women—above the 17% national average
- The College attracts students who want to become **engineers** — and **something more**, through studies in such areas as business, health sciences, foreign languages, music, art, and theater
