– Used for preparatory major advising

Registration Tips and Suggestions

1. Review your degree audit and note whether it reflects accurate the course credits you expected.

2. For MyPlan and Schedule Builder assistance, review FAQs here and/or consult the Academic Peer Advisors.

3. Two weeks before early registration, check MyUI to find the date and time your registration will open. For best course availability, register as close as to that time as possible.

4. Before enrolling, ensure there are still open seats in the course sections in your preferred schedule. If not, try building new schedules.

5. If all sections of a course are full, add yourself to the waitlist for any and all sections that work in your schedule. Keep a close eye on your email/text messages for waitlist seat notifications.

6. If a prerequisite for a spring course is failed in the fall semester, students will be administratively dropped from the course that requires that prerequisite.

Fall 2018
Taking Summer Courses?

Summer at the University of Iowa
Summer Course Registration: March 4-8, 2019

Courses typically offered:
(check MyUI for details)

- Principles of Chemistry I and II
- Introductory Physics I and II
- Foundations of Biology
- Engineering Math II, III, IV
- Statics
- Circuits
- Thermo
- Computers in Engineering
- Additional courses may be added—check MyUI

Summer at an institution near home

1. Decide which college you would like to attend.
2. Review transfer guides to determine which courses will transfer to University of Iowa:
   - Iowa and Illinois transfer guides
   - MyUI Transfer Search
   - Transferology
3. Call institution to inquire which courses are "typically" offered during the summer.
4. After completing courses, ensure your official transcript is sent to the University of Iowa.

Additional Advising Reminders

⇒ Schedule an advising appointment before early registration via MyUI (Student Information – Advising – My Appointments), or call our office at 319-335-5763.
⇒ Math — If currently enrolled in MATH:1010 or 1020, enroll in MATH:1550 for Spring
⇒ Chemistry — If currently enrolled in CHEM:1070, enroll in CHEM:1110 for Spring
⇒ ESL Courses — If you have required ESL courses left to complete, you must enroll in the required courses for the spring semester. ESL courses are not offered during the summer session.
