Present (Dean’s office and/or other visitors)
• Jon Kuhl

1. Professor Bhatti called the meeting to order at 3:30 p.m.

2. We discussed revision of the core curriculum. Nick Street’s Knowledge Discovery course was mentioned as a good introduction to informatics. The appropriate times and methods to introduce engineering models (i.e., traditional models based on mass balance, energy balance, physics, and chemistry) versus statistical models (regression, pattern recognition, big data analytics) was discussed.
