Graduate Programs:

University of Iowa College of Law
BEFORE the fair...

1. **Research** what companies will be attending the Engineering Career Fair and what they do; use the **Employer Directory** as a starting point: bit.ly/EPD020513. Take notes and make a list of companies you plan to visit at the fair.

2. **Update your resume** & have it reviewed by Engineering Professional Development staff. Include previous internships, relevant course projects, & leadership experience. See the Career Resource Manual for resume examples: bit.ly/epdmanual. Print off copies of your resume to hand out at the fair.

3. **Apply for on-campus interviews and positions** at [www.HireaHawk.com](http://www.HireaHawk.com). Companies will start scheduling interviews before the career fair & applying on HireaHawk gives you an early & competitive advantage with employers.

DURING the fair...

4. **Make a great first impression by dressing professionally.** Professional dress can include a business suit, dress pants or knee-length skirt with a blouse or button-down shirt, or a sport coat or sweater with a tie. Remember to shine your shoes!

5. **When speaking with an employer, start off with a firm handshake and introduce yourself.** In one minute or less, you need to tell the employer about yourself, demonstrate your knowledge of the company, express enthusiasm and interest, and relate your background to the company’s need. Then ask the representative appropriate questions regarding the company or possible employment opportunities.

6. **Bring copies of your resume, a few pens or pencils, a folder or portfolio, and a pad of paper.** Keep track of the recruiters you speak with and take notes on your overall impression of the company.

7. **Be an active participant and not just a browser.** The fair provides an outstanding opportunity to build your network and market your interests and skills to employers...so take advantage of all it has to offer!

AFTER the fair...

8. **Send thank you notes** or emails to the representatives you spoke with. This conveys professionalism and continued interest in the company/position.

9. **Stay in touch with your new contacts.** You have expanded your professional network and you should work on maintaining and growing these relationships. Check in with your contacts every few months and connect to them on [www.LinkedIn.com](http://www.LinkedIn.com).

10. **Apply for positions** with companies you are interested in. Review your notes from the fair to know where and how to apply. Most position postings will be at [www.HireaHawk.com](http://www.HireaHawk.com) and/or the company human resources/careers website.

Gilbane Building Company
Chicago, IL  
www.gilbaneco.com

Gilbane began in 1873 as a family-run carpentry and general contracting business. Since then the company has grown into one of the nation’s largest full-service construction firms. The Midwest Regional Office provides construction management, program management, design-build and general contracting services. The midwest region currently has over 180 employees across five states - Illinois, Wisconsin, Missouri, Iowa and Minnesota. Some of our most notable projects are: Elmhurst Memorial Hospital, University of Chicago Medical Center, Joliet Junior College, and SC Johnson Project Honor. What truly sets the company apart is that Gilbane lives the core values handed down by its founding fathers.

**Majors:** Computer Science  
**Position Type:** Full-Time; Co-ops
The back of the eye - the retina - is the only part of the human body where both the blood vessels and nerve tissue can be observed and measured without contrast, injections or scanning. IDx is at work on a series of products that can capture data from high-resolution images of the retina, and use this information to automate detection of diabetic retinopathy, risks of cardiovascular disease, and infections. The company has seven patented algorithms that can read digital photos of the retina.

Overall, IDx looks forward to reducing the cost and increasing the utility of retinal screening for diabetic retinopathy, hypertensive retinopathy and arteriole to venous ratios. We believe that an increase in these types of screenings will result in earlier treatment and lifestyle modifications in patients with diabetic retinopathy and at risk for cardiac disease, stroke and cerebral atrophy. Combined, these advances will result in less morbidity and mortality from these conditions.

United States Air Force  
Oak Creek, WI  
www.airforce.com

The mission of the United States Air Force is to fly, fight and win ... in air, space and cyberspace To achieve that mission, the Air Force has a vision of Global Vigilance, Reach and Power. That vision orbits around three core competencies: developing Airmen, technology to war fighting and integrating operations. From the stealthy F-22A Raptor and next-generation F-35 Joint Strike Fighter to bomb-disarming robots, remotely piloted aircrafts and the advanced V-22 Osprey tilt rotor, Air Force technology gives it the power to see and strike across the globe. The Air Force will need Engineers to make that happen.

US Navy  
Bloomington, MN

Today, the U.S. Navy has the distinction of being the world’s premier naval power. Complete with the big ships that one would most commonly associate with it. But to really understand why there’s a need for a sea-based military organization in this day and age, just consider that: 70% of the earth is covered in water 80% of the planet’s population lives within close proximity to coastal areas 90% of global commerce is conducted by sea.
