Engineering Tutoring – Review Schedule – Spring 2020

Engineering Tutoring offers exam reviews for many of the courses engineering students take in their first two years in the Engineering curriculum. Below are the scheduled Engineering Tutoring reviews for spring 2020. Check-in for reviews begins 10 minutes prior to the review at the location of the review. All reviews begin at 6:30 unless otherwise noted. Dates and locations are subject to change, but will be communicated via email with students enrolled in the courses.

Please be sure to sign-in for each review you attend. Everyone is welcome and encouraged to join the review session. Review materials will be shared with the instructors following the review to share at their discretion and will not be sent directly to students in the course. Plan accordingly to have a peer take notes if you are unable to attend.
