Hello,

Congratulations on completing week one of the fall 2020 semester! As a campus community we are learning and engaging in many different ways this semester, meaning it is even more important to recognize and utilize the many resources available to you at the University of Iowa. This email will share a variety of academic support resources for students across campus and the start of a new semester is a great time to check them out. Additionally, stay updated on the campus COVID-19 information, explore the resources available through the Office of the Dean of Students, engage with the opportunities coordinated by the Division of Diversity, Equity, and Inclusion, as well as learn more about the services provided through University Counseling Services and Student Health. Staff and faculty across campus are here to support you in a variety of ways!

Starting this Sunday, August 30, Engineering Tutoring will provide FREE virtual tutoring via Zoom Sunday-Thursday 6:00-8:00pm to students enrolled in the following courses: Principles of Chemistry I/II, Introductory Physics I/II, Engineer Math I-V, Statics, Circuits, Thermodynamics, Fluid Mechanics, Dynamics, Materials Science, and Mechanics of Deformable Bodies. My records show that you are enrolled in at least one of these courses, so I hope you take advantage of this resource!

Engineering Tutoring is a drop-in service, meaning no appointment is needed. Simply follow the directions below to sign-in and you can connect with one of our tutors – undergraduate students who have been successful in the courses they tutor. We also invite you to attend tutor-led midterm exam review sessions throughout the semester. A review schedule will be posted on the Engineering Tutoring website in the next two weeks. More information regarding exam reviews will be sent to students enrolled in the courses with reviews throughout the semester.

Engineering Tutoring Sign-In Procedure
We have split our tutors across different Zoom meetings based on the subjects supported. You will find Engineering Tutoring meetings dedicated to the Engineer Math courses, Chemistry and Physics, and Engineering courses. Circuits and Statics each have separate Zoom meetings as the Teaching Assistants for these courses serve as the tutors and use this link for office hours as well.

To access tutoring, simply click on the link associated with the subject you are looking to get some assistance with and sign-in with your HawkID/password. After you sign-in and select the course you are there for, your sign-in page will now include a green button that will open Zoom for you. When you join the session, you will first be placed into a waiting room – this is a great time to make sure you have the materials you need for tutoring readily accessible. You will be admitted to the room and are welcome to stay until 8:00pm when tutoring ends. If you have concerns regarding accessibility of virtual tutoring, please contact Adrienne Maxwell, Director of Instructional Support at engineering-tutoring@uiowa.edu.

Engineering Tutoring Sign-In Links
- Engineering Tutoring: Math for support in Engineer Math I-V
- Engineering Tutoring: Chemistry & Physics for support in Principles of Chemistry I/II and Introductory Physics I/II
- Engineering Tutoring: ENGR Courses for support in Thermodynamics, Fluid Mechanics, Dynamics, Materials Science, and Mechanics of Deformable Bodies
- CircuitTAtors Office Hours & Tutoring for support in Circuits
- sTAtics Jedi Office Hours/Tutoring/Study Tables for support in Statics

Engineering Tutoring Important Information
- Hours of Operation: Sunday-Thursday 6:00-8:00pm
- First Day of Tutoring: Sunday, August 30
- Tutoring Closed: September 6 and 7, November 3, and November 22-29
- Last Day of Tutoring: Thursday, December 10
If you are looking for additional academic support resources, check out Tutor Iowa, which has information about free resources such as Supplemental Instruction, academic help labs, academic tips worksheets, and so much more! Information about how to get connected with a private tutor can be found here. We will also be coordinating virtual academic support workshops that will cover topics such as time management, resiliency, and test taking throughout the semester – watch for more information regarding these workshops. Be sure to prioritize your academic success early by taking advantage of these great resources at the start of the semester. Academic support resources are a great way to collaborate with your peers while engaging with your course material.

Good luck with your semester!
Adrienne
